

December 2024

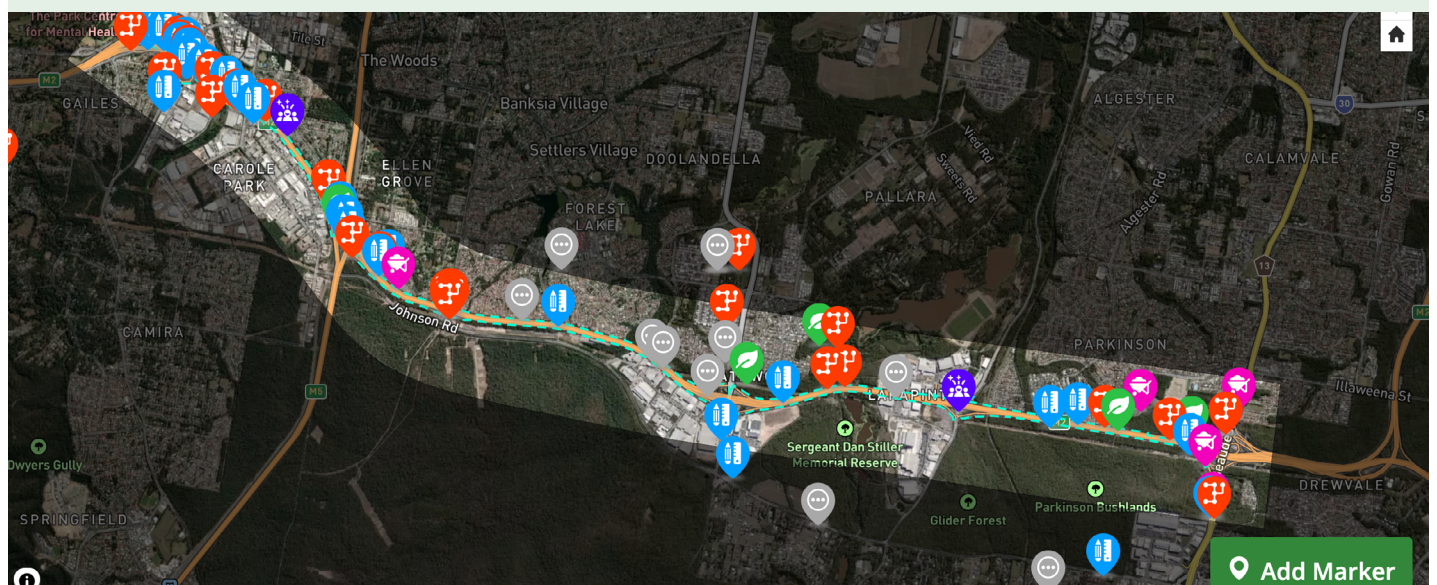

Artist impression of widened Logan Motorway at Formation Street – indicative only and subject to change.

Transurban is partnering with the Queensland Government to develop plans to upgrade approximately 10km of the western section of the Logan Motorway, between Formation Street and Mount Lindesay Highway. When completed, the project is expected to improve travel times, reduce congestion and improve road safety.

Since we launched community consultation in October, we've received over a hundred pieces of feedback on a range of topics including:

- Construction of additional emergency stopping bays
- Opportunities to integrate artwork and improve visual amenity across the project corridor
- Improvements to on and off ramps and motorway interchanges
- Management of road traffic noise, including during construction.

If you haven't already, please share your feedback via our project website loganwestupgrade.com. We encourage you to drop a pin on the map and share your thoughts on what's working well or what could be improved.

Project benefits

Reduce travel times by up to 20 minutes during peak periods by 2031

Reduce congestion on the motorway and local roads

Remove an estimated 6,100 trucks and cars from local streets daily

Create hundreds of local jobs

Improve road safety, reliability and connectivity for freight accessing key economic hubs

Community Legacy

At Transurban, we do more than just build road infrastructure—we are committed to enriching local communities and leaving a lasting positive impact.

Through our major projects, we've delivered a range of community legacy initiatives that have successfully transformed communities and inspired positive change.

We'd love to hear from you about any community legacy initiatives you'd like to see delivered in your local area as part of the project. Drop a pin on our website map to share your thoughts.

The current scope of work includes

Adding an additional lane in each direction between Centenary Motorway and Mount Lindesay Highway

Adding an additional lane westbound between Boundary Road and Formation Street

Upgrading key interchanges including Formation Street to cater for growing community and industrial hubs

Installing new smart motorway technologies

Motorway enhancements to allow improved access for over-dimensional vehicles

Some examples of previous Transurban community initiatives include:

Creating new parklands and playgrounds, including two educational cycle parks for kids to learn road safety in a fun, safe environment.

Collaborating with local Indigenous artists to honor the connection between our infrastructure and the land.

Brightening public spaces across our road networks with 26 artworks and color-lighting systems.

Support for young people pursuing science, technology, engineering and maths (STEM) subjects and careers through tailored programs, apprenticeships and training.

Partnering with Kidsafe for free child seat checks and fittings in Brisbane and Logan, ensuring safety for our youngest road users.

This round of community consultation on the project will close 8 December, so please visit www.loganwestupgrade.com to have your say.

There will be multiple opportunities for the community to provide feedback throughout the engagement process and Transurban will loop back to outline how feedback has been considered.

If you have any questions regarding the project, please reach out to our team via loganwestupgrade@transurban.com or 1800 LOGANW.
