

Early works and ground condition investigations update

July 2025

Transurban is partnering with the Queensland Government to develop plans to upgrade approximately 10km of the western section of the Logan Motorway, between the Ipswich Motorway and the Mt Lindesay Highway.

To guide the design and future improvements of the motorway, minor early works and ground condition investigations will be ongoing along the motorway from early July to late August 2025.

Works will involve

- potholing, coring and drilling the ground in various locations along the Logan Motorway corridor
- ecological surveys along the Logan Motorway
- service investigations and ground survey works
- short-term closures of Logan Motorway ramps.

These construction activities will include the use of drilling equipment, construction vehicles and machinery.

We expect to be in each location for one day or night to complete the investigation works before moving on and we'll do our best to complete noisy works early in the night where possible to avoid disrupting you.

These works will help inform the design of the Logan West Upgrade project and minimise future construction impacts.

What to expect

During these works, you may experience minor increases in noise and dust as well as temporary traffic changes and increased construction activity along the Logan Motorway, between the Ipswich Motorway and the Mt Lindesay Highway.

Work hours:

- Day works will take place from Monday to Friday, **6:30am and 6pm**, within the road corridor
- To reduce the impact of works on traffic during peak hours, night works will also take place on the motorway and some on and off ramps, from Sunday to Thursday, **8pm to 5am**.

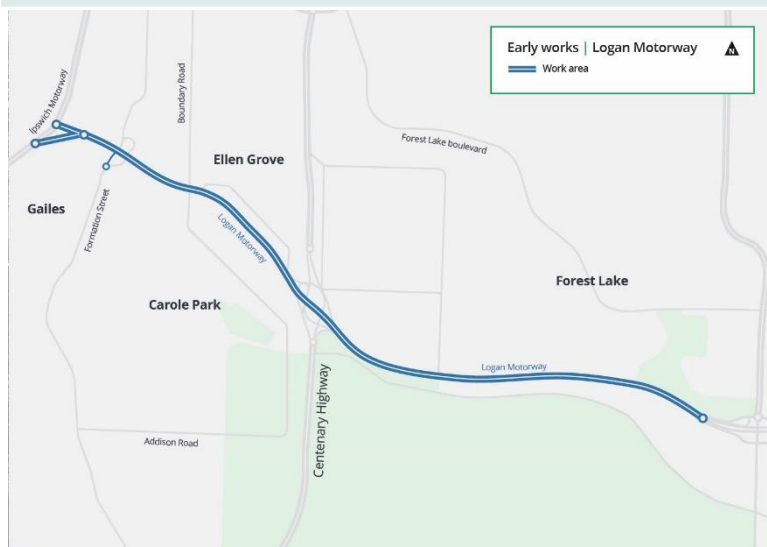

Temporary traffic changes

- Night-time intermittent ramp closures and rolling lane closures will occur along the Logan Motorway.
- Traffic control will be on site, where required, to direct motorists during works.
- Speed restrictions will be in place throughout the work sites.

A map of the impacted ramps has been provided overleaf.

We appreciate your patience during these important works and will continue to update you as work progresses.

Early works and ground condition investigations update

July 2025

Where are the ramp closures planned?

Short term ramp closures will be undertaken at night from early July to late August 2025 at various locations, as outlined on the map below (subject to weather and site conditions). Traffic control, including detours, will be in place to ensure the safety of workers and motorists.

For the most up to date ramp closure dates and information visit www.linkt.com.au/brisbane.

Please note all construction activities are subject to weather and site conditions.
